WELCOME

We are the largest manufacturer of HMHDPE, LDPE polyethylene packing materials in Kerala, a southern state of India. Our manufacturing plant and registered office are located in Kozhikode district(Calicut).

With more than a decade of market presence through consistent servicing and a clientele spilling over into the neighbouring states, Kairali Polypack has become almost synonymous with plastic packaging in this region of India.

WHAT IS NEW

We are all set to make a foray into the middle east market which holds immense potential for industrial packaging. Our focus, initially is on supplying polyethylene films (HDPE & LDPE) used widely in construction sites and agriculture for protection from bad weather conditions like rain, wind, dust, dirt etc. It comes in 2 to 4 meter wide rolls and available in natural clear and black. Thickness : 50 micron to 400 micron(0.05mm-

products

GROCERY BAGS

High density polyethylene bags used widely in retail merchandise such as groceries and bakeries for storing and transporting perishable food items. It extends the shelf life of food products by preventing moisture and dirt. Available in different grades and sizes to suit the retail needs.

RAIN GUARD FOR RUBBER PLANTATION

HDPE and LDPE sheets used as tapping shade in rubber tapping to facilitate dryness which is indispensable for tapping and therefore ensures uninterrupted tapping during rainy season. It also offers protection for latex collection cup fixed under tapping part. Available in different sizes.

GARBAGE BAGS

HDPE bags or collecting and removing rubbish. Different sizes and grades available.

POLYETHYLENE LINERS

HDPE film used as inner liners in packaging spices and grains. Different sizes and grades available.

SEAFOOD PACKAGING

High density and Low density films & bags for preserving seafood such as shrimp, squid and other fishes in transit. Available in different grades and sizes to suit varying customer needs.

CARRY BAGS - T- SHIRT TYPE

High density plastic bags made of premium grade resins, suitable for carrying and shopping purposes. Thanks to its load bearing quality, it is widely used for carrying vegetables, fruits, groceries, food etc. Available in different size

OIL POUCH CARRIERS

D-Cut HDPE bags custom designed for carrying oil pouches. It comes in varying sizes.

NEWS PAPER PACKAGING

High density film for wrapping news paper stacks in transit. Water proof and offer protection from dirt and dust. Sold as rolls and sheets and available in different grades.

TEXTILE BAGS

Made both of HDPE and LDPE high quality resins to ensure durability. The most popular carrier for textile shopping. A range of size, grade and colours offered.

Infrastructure

The Manufacturing unit, with an installed capacity of 150 tonnes per month, is housed in a 30000 SQ.FT plot with a built up area of 6000 sq.ft located between North beach and WestHill railway station, in Kozhikode district of Kerala.

We are equipped with single die, twin die and four die Monolayer blown film plant and fully automated as well as semi automated bag making machines.

The Processing technique is generally known as extrusion and the raw material is petroleum-derived resins known as thermoplastic polymers that have the capability of being shaped through the application of heat and pressure into plastic sheets. These sheets are then converted to various bag configurations.

According to the findings of The ULS Report, (An US journal to help people use less stuff by conserving resources and reducing waste) polyethylene packaging has the following environmental advantage compared to the conventional paper packaging. :

Plastic bags consume less than 6% of the water needed to make paper bags.

Plastic grocery bags consume 71% less energy during production than paper bags. Significantly, even though traditional disposable plastic bags are produced from fossil fuels, the total non-renewable energy consumed during their lifecycle is up to 36% less than the non-renewable energy consumed during the lifecycle of paper bags and up to 64% less than that consumed by biodegradable plastic bags. Using paper sacks generates almost five times more solid waste than using plastic bags.

After four or more uses, reusable plastic bags are superior to all types of disposable bags --paper, polyethylene and compostable plastic -- across all significant environmental indicators.

Constitution & Management

Kairali Poly Pack is a Pvt. Ltd. company registered under Indian Companies act 1956,. It has an authorised capital of INR 25million and a paid-up capital of INR 12.54 million . The company has a board of directors consisting of 15 highly experienced business men and professionals. Being a Private Ltd. Company the management is entrusted with the Board of Directors. As the entrepreneurial experience and professional knowledge of the promoters transcend the current line of business, the company is capable of taking on expansion and diversification at various levels without out sourcing

**Mr Ramachandra Bhat****Chairman**

Qualification – B.Com. More than 25 years expereiance in petroleum dealership (indianoil). Managing partner of one of the leading petroleum dealership in malabar.- lakshmi trading company. Having interest in real estate development under “good earth” brand, automotive dealerships of (piaggio & tvs), logistics solutions, warehousing soulutions, minning & international trading

**Mr Arun Sreenivasan****Managing Director.****(Operations and General Administration)**

A commerce Graduate with 15 years experience

**Mr Madhu Payyanadan****Director(Finance & HRD)**

A commerce graduate with 11 years experience with the Accounts Department in Airline Industry (Jetair Group of Companies)

**Mr Rinish Kizhalath****Director(Marketing)**

16 years experience in Marketing and Sales.

**Mr Subash K.G****Director (Systems Development)**

A Graduate in Engineering & Masters in Buiness Administration with 23 years of experience in the Construction industry as well as Systems planning & implementation.
